DETAILED ACTION

The amendment received on August 17, 2007 is acknowledged and entered. Claim 1-15 have been amended. Claims 16-20 have been added. Claims 1-20 are currently pending.

Response to Amendments and Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 15-17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

An invention, which is eligible or patenting under 35 U.S.C. 101, is in the "useful arts" when it is a machine, manufacture, process or composition of matter, which produces a concrete, tangible, and useful result.

Application/Control Number:

10/720,946 Art Unit: 3628

The claim, as currently recited, appears to be directed to a search engine (or data structure) which is nothing more than software or computer-executable instructions. Without reciting a computer-readable medium having said instructions embodied therein, said claim is considered to be directed to a non-statutory class of invention.

Allowable Subject Matter

Claims 1-14 and 18-20 are allowed.
